

Framing—setting trusses

Falls from elevation are one of the leading causes of injuries to construction workers in British Columbia.

- When framing, workers must not walk or work on top plates of interior or exterior walls.
- Wall-mounted brackets and work platforms allow workers to work without walking on the top plate.

Workers must not walk on top plates of walls.

Wall-mounted brackets can be mounted inside or outside of the wall.

An example of a job-built work platform.
